

LIVERPOOL LETTERBOX

INSTALLATION INSTRUCTIONS

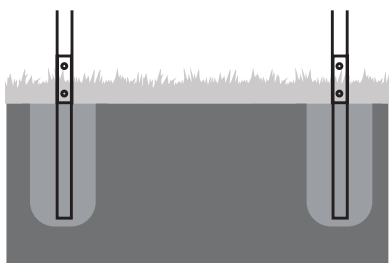

Requirements:

You will require the following to install your new pillar letterbox:

- Concrete
- Shovel
- Spirit Level
- Spanner

Please note: Before concreting, ensure the anchor posts are attached to the frame – do not attempt to concrete the anchor posts by themselves. Try to avoid concreting the letterbox frame into the ground, it is preferable that only the anchor posts go into the concrete.

Installation

Step 1

- a) Unbolt anchor posts that have been secured upside down within the frame posts.
- b) Reattach anchor posts so the frame is now extended as per diagram. Ensure bolts are tightly secured.

Step 2

- a) Measure the space between both anchor posts and dig two holes approximately the length of a standard shovel and the depth of the stakes.
- b) Check the holes you have made fit the posts of the letterbox and positioning allows for ease of use of your letterbox.
- c) Pour concrete into the holes to set into position. Use a level across the top of the letterbox and adjust accordingly to ensure your letterbox will be set at a square angle.

Once the concrete has set your new pillar letterbox is ready to use.

LIVERPOOL LETTERBOX

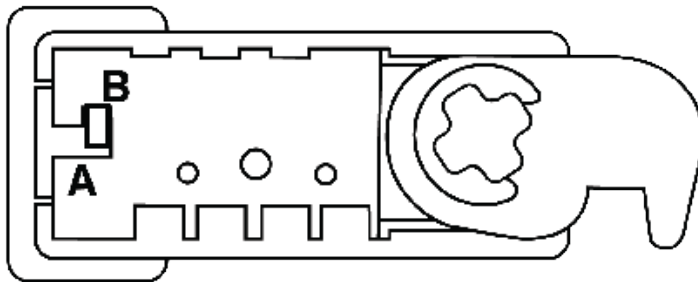

INSTALLATION

INSTRUCTIONS

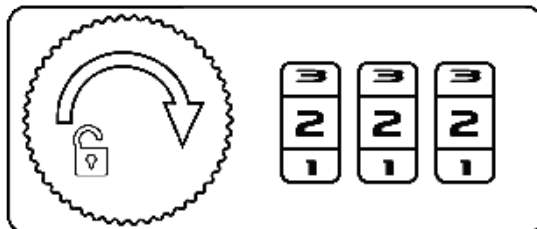

How to set your combination lock:

The initial password is 0-0-0; to set your own password, please follow these steps:

1. Push the reset button from "A" to "B".

2. Set your own password by turning dials; ensure the numbers in the middle row are evenly aligned as shown below.

3. Push the reset button back to "A". The setting is completed.
